CONTENTS

Some new families of integral graphs by G. Indulal, R. Balakrishnan and A. Anuradha	... 805
Heat transfer in MHD oscillatory flow of dusty fluid in a rotating porous vertical channel by Khem Chand, K. D. Singh and Shavnam Sharma	... 819
<i>IFP</i> -injective, <i>IFP</i> -flat modules and localizations by Lu Bo and Liu Zhongkui	... 837
Matrix product(modulo-2) of graphs by K. Manjunatha Prasad, G. Sudhakara, H. S. Sujatha and K. V. Soumya	... 851
On a functional connected to the laplacian in a family of punctured regular polygons in \mathbb{R}^2 by A. R. Aithal and Acushla Sarswat	... 861
The coincidence nielsen number for covering maps for orientable manifolds by Fida Moh'D	... 875
On the depth of fiber cones of stretched m -primary ideals by A. V. Jayanthan and Ramakrishna Nanduri	... 925
Balancing Dirichlet series and related L -functions by Sudhansu S. Rout and G. K. Panda	... 943
Braided equivariant crossed modules and cohomology of Γ -modules by N. T. Quang, C. T. K. Phung and P. T. Cuc	... 952
The character spaces and Šilov boundaries of vector-valued lipschitz function algebras by K. Esmaili and H. Mahyar	... 977
Multiple soliton solutions, soliton-type solutions and rational solutions for the (3+1)-dimensional potential-YTSF equation by Jianguo Liu and Zhifang Zeng	... 989
Estimation under failure-censored step-stress life test for the generalized exponential distribution parameters by Ali A. Ismail	... 1003
An efficient method for nonlinear fractional differential equations: combination of the adomian decomposition method and spectral method by E. Babolian, A. R. Vahidi and A. Shoja	... 1017
