

## CONTENTS

An $L^p$ - $L^q$ version of Miyachi's theorem for the Riemann-Liouville operator by Hleili Khaled and Omri Slim	... 121
A note on the loglog law for diffusion in random environment by Ping Lü, Guangyu Yang and Xiaocai Zhang	... 139
Weighted Caffarelli-Kohn-Nirenberg type inequality on the Heisenberg group by Yazhou Han	... 147
On the hamiltonicity of random bipartite graphs by Yilun Shang	... 163
The gerstenhaber bracket of hochschild cohomology of triangular quadratic monomial algebra by Yuan Chen, Yanhong Guo and Yunge Xu	... 175
On trees with equal 2-domination and 2-outer-independent domination numbers by Marcin Krzywkowski	... 191
The existence and exponential stability for neutral stochastic partial differential equations with infinite delay and poisson jump by Huabin Chen	... 197
Disjointness in supercyclicity on the algebra of Hilbert-Schmidt operators by Liang Zhang and Ze-Hua Zhou	... 219
Whittaker transform on distributions by M. M. Rodrigues and N. Vieira	... 229
The $L^p$ -continuity of imaginary powers of the Dunkl harmonic oscillator by Béchir Amri and Hassen Tayari	... 239
