## CONTENTS

Fusion frames for operators in Hilbert $C^*$ -modules <i>by M. Khayyami and A. Nazari</i>	... 791
Existence of positive solutions for an elliptic system involving nonlocal operator <i>by Sh. Shahriyari, H. Zahmatkesh and S. Shakeri</i>	... 805
Complete sets <i>by Theophilus Agama</i>	... 817
*-Jordan semi-triple derivable mappings <i>by Lin Chen and Jianhua Zhang</i>	... 825
Convergence rates of solutions for elliptic reiterated homogenization problems <i>by Juan Wang and Jie Zhao</i>	... 839
A numerical study of eigenvalues and eigenfunctions of fractional Sturm-Liouville problems via Laplace transform <i>by Mahnaz Kashfi Sadabad, Aliasghar Jodayree Akbarfam and Babak Shiri</i>	... 857
Splitting of the pullback of $T_{\mathbb{P}^3}$ on an elliptic curve <i>by Amit Kumar Singh</i>	... 869
A note on the linear stability of the steady state of a nonlinear renewal equation with a parameter <i>by Suman Kumar Tumuluri</i>	... 879
Equichordal tight fusion frames <i>by Mozghan Mohammadpour, Rajab Ali Kamyabi-Gol and Ghosheh Abed Hodtani</i>	... 889
Finite groups with systems of $\Sigma$ - $\mathfrak{F}$ -embedded subgroups <i>by Yuemei Mao and Xiaojian Ma</i>	... 901
Laplacian spectral characterization of (broken) dandelion graphs <i>by Xiaoyun Yang and Ligong Wang</i>	... 915
A characterization of nonnegativity relative to proper cones <i>by Chandrashekar Arumugasamy, Sachindranath Jayaraman and Vatsalkumar N. Mer</i>	... 935

Periodic solutions of the $N$ -preys and $M$ -predators model with variable rates on time scales <i>by Shekhar Singh Negi, Syed Abbas and Muslim Malik</i>	... 945
Multiple convolution formulae of Bernoulli and Euler numbers <i>by Wenchang Chu</i>	... 969
The geometric properties of a class of nonsymmetric cones <i>by Shiyun Wang</i>	... 989
A natural Hermitian line bundle on the moduli space of semistable representations of a quiver <i>by Pradeep Das</i>	... 1003
Halanay inequality on time scales with unbounded coefficients and its applications <i>by Boqun Ou</i>	... 1023
Atomic subspaces for operators <i>by Animesh Bhandari and Saikat Mukherjee</i>	... 1039
The sphere method for the inverse problems of the Radon transforms <i>by Yufeng Yu</i>	... 1053
Sufficient conditions for existence of integral solution for non-instantaneous impulsive fractional evolution equations <i>by Jayanta Borah and Swaroop Nandan Bora</i>	... 1065
Ramanujan—Mordell type formulas associated to certain quadratic forms of discriminant $20^k$ or $32^k$ <i>by Anup Kumar Singh and Dongxi Ye</i>	... 1083
Curves on a smooth surface with position vectors lie in the tangent plane <i>by Absos Ali Shaikh and Pinaki Ranjan Ghosh</i>	... 1097
Hardy-type operators in Lorentz-type spaces defined on measure spaces <i>by Qinxu Sun, Xiao Yu and Hongliang Li</i>	... 1105
On the third-order Horadam and geometric mean sequences <i>by Gamaliel Cerda-Morales</i>	... 1133
On sum of the powers of distance signless Laplacian eigenvalues of graphs <i>by S. Pirzada, Hilal A. Ganie, A. Alhevaz and M. Baghipur</i>	... 1143
On centrally extended reverse and generalized reverse derivations <i>by Susan F. El-Deken and Mahmoud M. El-Soufi</i>	... 1165
Almost everywhere strong $C, 1, 0$ summability of 2-dimensional trigonometric Fourier series <i>by Ushangi Goginava</i>	... 1181
The prime index function <i>by Theophilus Agama</i>	... 1195

A study of error estimation for second order Fredholm integro-differential equations <i>by R. Parvaz, M. Zarebnia and A. Saboor Bagherzadeh</i>	... 1203
Exact solutions of generalized Riemann problem for nonhomogeneous shallow water equations <i>by Suet Millon Sahoo, T. Raja Sekhar and G. P. Raja Sekhar</i>	... 1225
On positive injective tensor products being Grothendieck spaces <i>by Shaoyong Zhang, Zhaohui Gu and Yongjin Li</i>	... 1239
Stokes flow past porous bodies of arbitrary shape <i>by R. Radha and B. Sri Padmavati</i>	... 1247
