The application of forecasting system in the control of blister blight of tea *by* C. S. VENKATA RAM 377

Meteorological factors and disease expressions in jute *by* NIRMALENDU MUKERJEE 384

Epidemiology and control of charcoal rot of some crop plants in India *by* M. J. THIRUMALACHAR, F.N.A. 394

Some aspects of epidemiology and control of phyllosticta leaf spot of arhar [*Cajanus cajan* (L.) Millsp.] *by* H. K. SAKSENA *and* KUMUD KUMAR 399

Role of humidity on sporulation pattern and infection in anthracnose of Sorghum caused by *Colletotrichum graminicola by* S. SINHA *and* J. K. SHARMA 407

Forecast and control of nutritional diseases in plants *by* N. S. RANDHAWA *and* N. S. PASRICHA 413

Forecasting and control of rice diseases *by* S. Y. PADMANABHAN, N. K. CHAKRABARTI *and* K. V. S. R. K. ROW 423

Rain sampling in the study of rice blast epidemiology *by* A. C. KUSHALAPPA, R. K. HEGDE *and* E. E. SAARI 430

Control of udbatta disease of rice *by* N. N. MOHANTY 432

A Calculated guess of future rust development in cereal crops *by* J. C. ZADOKS *and* F. H. RIJSDIJK 404

Plant growth and development of *Heterodera avenae* Wollenw., 1924 at different population levels *by* J. S. GILL *and* GOPAL SWARUP .. 444

Epidemiological aspects of *Puccinia graminis* var. *tritici* in India *by* L. M. JOSHI, E. E. SAARI *and* S. D. GERA 449

Cyclical variations in spore production by *Puccinia graminis tritici* *by* A. S. PRABHU *and* JACK R. WALLIN 454

Epidemiological studies on wheat rusts in Simla hills. Survival and multiplication of yellow rust inoculum at the source *by* D. SURYANARAYANA, L. B. GOEL *and* V. C. SINHA 460

Spread of sugarcane mosaic and grassy shoot in nature *by* K. S. BHARGAVA, R. D. JOSHI *and* S. M. A. RIZVI 464

Effect of varying temperature, humidity and light during incubation in relation to disease development in blight of gram (*Cicer arietinum*) caused by *Ascochyta rabiei by* R. K. S. CHAUHAN *and* S. SINHA .. 473

Page

Computer techniques for the Analysis of Epidemics *by* J. KRANZ .. 483

Quantitative and qualitative losses in paddy due to Helminthosporiose epidemic *by* P. VIDHYASEKARAN, N. RAMADOSS *and* N. SRINIVASALU .. 487

Factors affecting sporulation of *Leptosphaerulina briosiana* *by* MAHESH PANDEY 494

Control of leaf spot of maize caused by *Curvularia* species *by* A. M. MANDOKHOT *and* K. C. BASU CHAUDHARY 502

Aeromycological observations and their implications in the epidemiology of some diseases of sugarcane *by* T. SREERAMULU 506
